

Pharos Integrated Multifunction Printers

Transform Printing with Pharos Blueprint® Enterprise Software and Sharp OSA®-Enabled MFPs

Pharos Systems International has created an integration of Pharos print management software and Sharp OSA®-enabled multifunction printers (MFPs). The resulting **iMFP (integrated MFP)** harnesses the power of Pharos Blueprint® Enterprise directly from the touchscreen control panel of the Sharp MFP. A single device is thus capable of delivering not only print, copy, scan, fax, and e-mail services but also Pharos-powered authentication, print release, and print/copy accounting.

With the iMFP solution, the device is locked down until users authenticate themselves by swiping a magnetic stripe ID card, holding up a proximity ID card, or entering a username/password. The Secure Release Here® application allows employees to submit jobs from their computer and then release them for printing at the iMFP that's most convenient, regardless of where it's located—down the hall, four floors up, in an adjacent building, or in a satellite office thousands of miles away. And because jobs can only be printed when users are physically present at the iMFP, document confidentiality is protected.

- **Cost Savings**
- **Waste Reduction**
- **Security**
- **Flexibility**

The Pharos iMFP also helps businesses go green while improving their bottom line. With Secure Release Here, employees use the iMFP's touchscreen to select the documents they really need to print, deleting (or letting the system delete) unnecessary or redundant jobs. This can have a major impact on waste and its associated costs. Even more significant savings are achievable through the Policy Print™ application. It enables businesses to define printing policies and enforce them in real time as soon as a user submits a job that crosses the line. For instance, a company could use Policy Print to block employees from printing e-mail in color or sending a 10-page document to a desktop printer.

Behind the scenes, Blueprint Enterprise gathers usage data by employee, device, and location across the entire enterprise and runs it through a sophisticated costing engine. The result is a complete and accurate picture of how much is being printed and copied, by whom, on what device, and at what cost. The process is completely invisible to employees so they can focus their attention on core business tasks.

For a list of supported Sharp OSA-enabled MFPs that can be integrated with Pharos Blueprint Enterprise, visit www.pharos.com/Sharp-iMFP.

Pharos Systems

Pharos Integrated Multifunction Printers

Features and Benefits

- **One device does it all** – With copy volumes shrinking and print volumes growing, it makes good financial sense to have one MFP that can print and copy (as well as scan, fax, and e-mail) rather than multiple single-function devices. Embed Pharos solutions into the MFP and the result is an even more powerful device with the same streamlined footprint.
- **Single user interface** – The touchscreen panel of the iMFP contains the interface to the end-user features of Blueprint Enterprise. The same Pharos user interface is featured on all supported Sharp OSA-enabled MFPs.
- **ID card devices** – Magnetic stripe or proximity card readers can be integrated into the system for quick and easy user authentication.
- **Secure Release Here** – The iMFP is protected from unauthorized use because employees must authenticate themselves before using the device. And since jobs are only printed when the person who submitted them is physically present at the iMFP, document confidentiality is protected. Secure Release Here also provides users with unparalleled flexibility by enabling them to print their jobs at any iMFP. And waste is reduced because users print only the jobs they really need—rather than every job they submitted.
- **Policy Print** – Blueprint Enterprise can help create a corporate culture of responsible printing by enabling companies to define policies for cost and waste reduction, and then automatically notify employees via pop-ups on their workstations when their jobs are inconsistent with the rules. Policy Print can inform, warn, or deny printing privileges. For example:
 - Inform:* “Please consider printing documents 2-sided to reduce waste and save money.”
 - Warn:* “Printing this document in color will cost about \$7.50. Please consider canceling the job and resubmitting it in B&W. You may choose to continue, understanding that this is an exception to policy.”
 - Deny:* “E-mail may not be printed in color. Color printing costs 5 times more than B&W.”
- **Print/copy accounting** – Blueprint Enterprise tracks all printing and copying in the enterprise and calculates output costs based on the actual utilization of devices plus their fixed and variable costs. Management will know exactly how much is being printed/copied and what it costs, enabling fact-based decisions to be made about right-sizing and optimizing the output environment.
- **Reports** – Blueprint Enterprise provides a large library of reports that summarize information by employee, device, and location. It generates a number of key metrics that management can use to assess the output environment, including print and copy volume, employee-to-device ratio, cost per page, prints per employee, cost per employee, device utilization rate, etc.
- **Waste savings** – Blueprint Enterprise tracks jobs that employees submitted but did not print, allowing companies to measure their progress in reducing printing waste.

Pharos Systems International (www.pharos.com)

Making every print an intelligent decision™ is the mission of Pharos Systems International. Pharos provides powerful print management and optimization solutions to corporations, educational institutions, and libraries across the globe. Pharos software and services save customers money, reduce waste, and make it easy to secure devices and documents. The company was founded in 1992 in Auckland, New Zealand, where it maintains an R&D facility. Corporate headquarters are in Rochester, NY.

Pharos, Pharos Blueprint, Secure Release Here, and Policy Print are trademarks or registered trademarks of Pharos Systems International. Sharp, Sharp OSA and all related trademarks are trademarks or registered trademarks of Sharp Corporation and/or its affiliated companies.
