

## Quality Assurance Analyst

### Company Description

Pharos enjoys a growing capacity to be an invaluable resource to those organizations committed to making every print an intelligent decision. To help us, here's one the positions we're looking for the right person to assume:

### Quality Assurance Analyst

The successful candidate will be responsible for ensuring that Pharos' products are developed and delivered to exacting quality standards. The candidate will work as a member of the Pharos development team to build quality processes into the design and development phases of the product lifecycle. The candidate will be responsible for developing and executing test processes to ensure that targeted quality standards are met.

### Experience and Requirements:

- The highest ethics, enthusiasm and passion with a consistently positive attitude a must
- Ability to work as an effective member of a team bringing quality leadership to a development environment
- Minimum 4 years quality assurance experience with a proven track record of building quality into a process
- Excellent written, verbal and personal communication skills
- Experience with JIRA or similar defect tracking software
- Experience with Microsoft Office applications
- Experience with digital printing or document lifecycle management a plus

### Compensation:

Pharos Systems offers competitive salaries commensurate with experience and education, as well as excellent benefits.
