

Software Engineer

Company Description

Pharos enjoys a growing capacity to be an invaluable resource to those organizations committed to making every print an intelligent decision. To help us, here's one of the positions we're looking for the right person to assume:

Software Engineer

Successful candidate will be a critical member of a small team charged with the design and development of .NET and/or Java based applications. The position will require the candidate to interface with Pharos' partners in the specification and implementation of solutions so excellent communication and interpersonal skills are a must.

Technology Requirements:

- 2+ years experience in a technical development field with a proven track record of architecting, designing and delivering high quality .Net and/or Java based solutions in a timely manner.
- Candidates with Microsoft .NET development skills should include .NET 2.0 or better. At least some experience with web services technologies. e.g: ASP.NET, SOAP, JSON, WCF. Experience with SQL Server a plus.
- Candidates with Java skills should be proficient in Java 1.3+ with experience using AWT, OSGi, and embedded Java technologies a plus.
- XML experience is also greatly desired, including experience with XSLT and AJAX.
- BS Computer Science or equivalent.

Other Requirements:

- The highest ethics, enthusiasm and passion with a consistently positive attitude.
- Excellent communication and development skills.
- Clear evidence of Object Oriented Design skills.
- Strong problem-solving and creative thinking skills.
- Team player - ability to work on cross functional teams.
- Self-Starter - ability to work independently and with initiative.

Compensation:

Pharos Systems offers competitive salaries commensurate with experience and education, as well as excellent benefits.

Please electronically submit your resume, salary requirements, and at least two references to Pharos Systems International at careers@pharos.com
